WHY WE EXIST

We care about the safety and welfare of people, and we believe that quality service should not be the exception, but the norm. Therefore, we vet and employ only the most qualified and experienced individuals to provide safety and industrial rescue services by upholding safety regulations and rapidly responding to emergency situations to protect people, worksites, and brands.

WHO WE ARE

Our company was incorporated in 2006 as Above The Tracks, due to the rail industry we mainly served. Over the years as our service offering has expanded, we have had to rebrand ourselves to reflect the shift to a wider array of industries we now serve. Since April 2021, we officially rebranded ourselves as JSS Safety & Rescue, LTD, and have been doing business as such ever since. We support safety and rescue nationwide, and hold ourselves to the highest standards in the industry because we care about the safety and welfare of workers and worksites.

SAFETY PROFESSIONALS

SAFETY SERVICES INCLUDE

- Employee orientation and training
- Over-see weekly safety meetings
- Participate as requested in project meetings
- Ensure compliance of OSHA and client's specifications of safety rules and programs by all employees and sub-contractor personnel
- Communicate with all employees and sub-contractors the project's safety compliance expectations
- Lead all incident investigation and analysis
- Conduct weekly walk-thru of site
- Daily presence and inspections to maintain a safe site

Our certified and experienced **safety professionals** work in a wide range of industries and add value to any project by helping prevent harm to workers, property, and the environment. They will verify, advise, and train on all aspects of safety for your project. Our team will help you implement safe work procedures and rules to provide a safe work environment.

We care about the safety and welfare of

SAFETY AUDITS

Like you, we are committed to maintaining safe work environments throughout the year. We conduct periodic comprehensive **Safety Audits** to assist you in remaining compliant with all company, local, or state regulations.

INDUSTRIAL STAND-BY RESCUE

INDUSTRIAL STAND-BY RESCUE

Every rescue plan is different. That is why our rescue teams are highly experienced and well-trained in **confined space rescue** and **high angle rescue**. Our teams have a proven track record of mitigating risks and are available to assist you 24/7, 365 days a year.

Safety is always a priority and never an afterthought, so whether your project is in need of rescue teams, rescue training, or the need to develop or update a rescue plan, we will help you stay prepared for any situation.

TRAINING

We offer general and client-specific training courses, in either a classroom or hands-on setting, at your facility or ours. Courses include: OSHA 10 & 30 Hour, General Industry, Scaffolding, Confined Space Rescue, etc. All of our trainers have first-hand safety and rescue experience and will tailor the content to your unique project's or work-site's needs.

ATTENDANTS

Our **attendants** are well trained, and familiar with rescue and safety procedures, especially as it pertains to confined space entry, fire watch, bottle watch, and in all instances will monitor the work environment and alert rescue teams if needed.

people, worksites, and brand reputations.
